**SUPPLEMENTARY INFORMATION:** On July 29, 2022, DOE published a notice of intent to establish a working group for CUACs and CUHPs, under the Appliance

Once the working group reaches consensus on recommended test procedures and energy conservation standards, these recommendations are made to ASRAC, which may then use such consensus as the basis for making a recommendation to the Department. The Department, consistent with its legal obligations, may use such consensus as the basis of a rulemaking, which then is published in the *Federal Register*.

As a result of these meetings, the working group successfully reached consensus on a proposed test procedure for CUAC and CUHP equipment. On March 7-8, 2023, and March 21-22, 2023, the working group held public meetings to begin negotiations in an attempt to reach consensus on amended energy conservation standards for CUACs and CUHPs. This notice announces additional public meetings to continue these negotiations.
